## EDUCATION

**Georgia Institute of Technology** – **M.S** in Computer Science ***Anticipated Graduation: May 2027***

**Drexel University** – **B.S** in Computer Science, **Minor**, Finance *GPA: 3.52*
**Institut National des Sciences Appliqués de Lyon** ***Sept 2021 – Dec 2021***

## RELEVANT SKILLS

**Programming Languages:** Python, PowerShell, Bash, SQL, Go
**Technologies/Tools:** Git, JIRA, CI/CD Pipelines, AWS (GuardDuty, IAM, SCPs), Azure (AD, Cosmos DB, Functions), Snowflake, OpenStack, Wireshark, Splunk, ELK, Grafana, Nagios, Fortinet Services, OPA, Key Vault,

## WORK EXPERIENCE

***Comcast Inc.*** ***May 2023 – Present***
***Security Engineer III*** ***Philadelphia, PA***

- Designed Zero Trust micro-segmentation guardrails across AWS, Azure, and OpenStack; authored SOPs, led TSF Office Hours, and drove knowledge transfers enabling full CIEC team onboarding
- Built cloud IP automation pipelines (AWS/Azure) enforcing quarterly CIDR ingestion and guardrails across 1,000+ access policies and segmentation controls, eliminating manual change windows and reducing misconfiguration risk
- Engineered Grafana and ELK observability dashboards aggregating ~40 infrastructure and security signals to surface policy violations, error spikes, and anomalous traffic in real time
- Authored 9 architectural design documents spanning OSI layers 2, 3, and 7, defining edge cases, failure modes, and lifecycle patterns for new security integrations
- Developed and shipped a Bash/PowerShell diagnostic suite of 6 network tools via CI/CD pipeline, used live on bridge calls to accelerate incident mitigation and reduce mean time to resolution during outage escalations
- Prototyped POC initiatives to automate TSF support workflows; triaged ~100 tickets per quarter (CREQs, white-glove sessions, CIEC escalations) while identifying engineering improvements
- Architected two internal AI tools via full SDLC with CI/CD and code review: a RAG-powered Slack/Jira bot (Azure Cosmos DB, Functions, OpenAI GPT) deflecting 35% of inbound issues, and an MCP agent for natural language querying across TSF architecture, network, and support docs
- Coordinated response to 7 severe security breaches across Fortinet, Cisco, and Palo Alto platforms, managing firewall ticketing and troubleshooting end-to-end

***Susquehanna International Group, LLC.*** ***Mar 2022 – Sept 2022***
***Firewall Engineer*** ***Bala Cynwyd, PA***

- Served as initial point of contact for ~100 firewall issues per month, triaging and resolving connectivity requests across 25 global offices and exchanges
- Performed security assessments and configured layer 2 and layer 3 firewall connections, ensuring compliance with enterprise network policies
- Designed and implemented a scalable firewall compliance automation framework using Python and MySQL, enforcing policy consistency across 200+ security devices and reducing manual audit overhead

***Comcast Inc.*** ***March 2021 – September 2021***
***Security Engineer*** ***Philadelphia, PA***

- Identified 50+ potential enterprise threat actors using Mandiant FireEye, contributing to proactive threat intelligence across the security organization
- Developed 3 Splunk SPL detection searches for logged security use cases, improving automated threat identification in the SIEM pipeline
- Mapped 200+ TITAN SIEM log sources and detections to the MITRE ATT&CK framework, ensuring comprehensive coverage across all attack vectors

## AWARDS AND ACTIVITIES

- Comcast Inc., SSE (ICE) Innovation in Cybersecurity Engineering Award (2025)
- Beta Chi Theta Fraternity Inc., Vice President (2019 – 2021)
- Nepali Student Association, Co-Founder/Treasurer (2019 – 2021)
